3) Introduction

3.1 Project Background

Data entry is integral part of any computerization initiative. Computerization basically demands software residing in hardware and software can't work without input of any data. This data can either be obtained through migration from any legacy software or through data entry.

Key objective of this RFP is to select a competent agency which will supply Data Entry Operators to various Sub Registrar Offices in the JDR district. Only the experienced, reputed, and financially sound agencies shall be considered.

3.2 About Department of Registration & Stamps, Maharashtra

The Department of Stamps and Registration looks after registration of documents and recovery of stamp duty. A set procedure of registration and collection of stamp duty is laid down as per the Registration Act, 1908 and Maharashtra Stamp Act. The software module for Registration has been prepared by the Department in collaboration with NIC. The SRO, in addition to service of Registration of documents, carries out other activities such as:

- ❖ Search of previous transactions
- ❖ Issue of Indexes
- ❖ Valuation
- ❖ Issuing Various Copies as per demand
- ❖ Sending Reports as per requirement
- ❖ Marriage Registration under Special Marriage Act

For the Department, the state is divided into eight divisions (DIG Offices) and each division has different number of districts (JDR Offices). Refer Annexure IV for various DIG and JDR offices.

3.3 About iSARITA Application

SARITA software was originally developed by CDAC in which total process of registration including valuation of the property is performed using computers. After the essential data entry pertaining to the document to be registered is done, the original document is scanned after registration and original document is immediately returned back to the registrant within 30 minutes. This has saved a lot of time and energy of the citizens and the Department staff as well. Based on same protocol, now NIC has developed web based iSARITA, an advanced and integrated version of SARITA. This software has increased the quality of registration in various parameters.

Please refer to Annexure V for Work Flow of registration process.

3.4 Contract Period

This project aims to invite agencies, who can supply skilled Data Entry Operators for carrying out work in various Sub Registrar Offices in the district as referred section 1 under the jurisdiction of the DIG as referred in section 1, initially for a period of 2 years which may be extended further by 1 year depending upon the requirement and administrative convenience of the DIG.
